## *View from the Dome*

### **Dear Family, Friends, and Fellow Researchers,**

It is with tremendous pride that I introduce Kelly Research Technologies, Inc. The mission of our company is to put top quality scalar and phase conjugate technology in the hands of the vast community of radionic, psychotronic and other “subtle energy” researchers and practitioners.

In the beginning our focus will be to continue to build and support the systems and devices that were developed by my father, Peter J. Kelly, and distributed through Interdimensional Sciences (IDS), Dimensional Sciences (DSI) and under the BETAR trademark. As time passes we will continue to advance this technology by completing research underway at the time of my father’s passing, as well as through launch of new research programs in collaboration with the world’s greatest radionic theorists and engineers.

Instrumental to the success of this new company is three critical factors: First, we have the unanimous support of the other heirs. Without the blessings of my sisters Patt, Inez and Erin, as well as my father’s friend Diane, there would be no grand opening and my father’s enterprises would have fallen silent. Secondly, while this new company is a team effort between myself, my sister Erin, Cathie Jordan (18 years, Editor and Business Manager) and David Taylor (23 years, Engineering and Manufacturing); without Cathie and David we would be lost. They were the heart and the hands of IDS and DSI, their knowledge and experience is irreplaceable to us now. Finally, we have all of you: the men and women who give our company a reason to exist. Collectively you do more investigation and are more responsible for the advancement of this technology than any institute or laboratory.

Which brings me to introduction of this newsletter, the *Kelly Research Report*. It is our goal that these newsletters serve both as a hub and a beacon of communication for you, the community of scalar researchers and practitioners. We will provide practical information and tips that researchers can employ to maximize the use and effectiveness of their Kelly Analyzers and the other systems we manufacture. We will publish the results of our research, as well as the research of those of you who wish to contribute. We will seek out and discuss the work being done throughout the fields of radionics, psychotronics and the other “subtle energy” technologies, thus helping our users to stay abreast of how new technologies and ideas can be explored, tested and utilized in their daily lives. Finally, we will capture and present fun, interesting and/or important news about our lives, our world and each other, aspire to serve you as an almanac for the modern age.

My father said countless times that the essence of scalar theory is simply that there is limitless power bound in the relationship between information and energy, and through this newsletter and our efforts as a company we hope to be a source of both to all of you!

With Warmest Regards,

*Ed Kelly*

**P.S. Drop us a line and let us know what you are working on!** We will guarantee the privacy of any contributor who wishes to share their results with the rest of their community. You may reach us at: **PO Box 128, Lakemont, Georgia, 30552.**

# Grand Opening Sale!

We want to celebrate the launch of Kelly Research Technologies by having a sale to beat them all. Every order placed between now and mailing of the next issue of the *Kelly Research Report* on March 30 will be discounted by a flat 10%. Books, supplies, accessories, ELF units, the BETAR and the famous Kelly Analyzers: nothing we make or sell will be held back!

## We need your help!

Now some of you are thinking, "They won't be in business long if they are going to give away the store on the first day!" You folks are right: There IS no way that we will be able to afford to repeat a sale like this in the foreseeable future. But here on Day One we cannot afford NOT to run a big sale. I'm not ashamed to tell you that the expenses associated with organizing and launching this company have been significant, and there were some days in the year and a half since my father passed that I was not sure we would be able to hold onto the keys to the dome that he built. Together Cathie, David, Erin and I have struck the spark to light the tinder, but we simply must have your support if we are going to turn this tiny flame into the kind of fire that will move this train out of the station. We are not looking for a handout, just asking you to go ahead and purchase those tools and instruments that will enable you to work more effectively or more powerfully, to more rapidly advance the research and experimentation you are already doing.

## Consider the Phase Array Antenna.

A perfect addition to any researcher's bench is the Phase Array Antenna. As you all know, the rubbing plate on your Kelly Analyzer is not only the point at which the user's focused intent is introduced into the analysis circuit; it also acts as the antenna by which the information is actually transmitted as energy back to the soil, water, plant or farm animal the researcher is studying. My father developed the Phase Array Antenna in response to reports that the intensity of Earth's magnetic field is slowly weakening (please see: Earth's Magnetic Field is Fading, also in this issue). Regional, local or micro-local variations in the changing rate of field intensity seemed to be interfering with the effectiveness of some Instrument Operators, as well as their ability to effect permanent case reversals. He theorized that the latter evidence was due to the increased transmission of scalar information between the infinite, interlocking, parallel dimensions that surround and permeate the 3D world we live in. The result would be that while Farmer John's radionically monitored lettuce is healthy in our dimensional plane, the lettuce in the gardens in the mirror image worlds around Farmer John's could be weak and an easy target for insect infestation. This message that could be leaking back across the softened magnetic membrane where it could generate tangible modifications to the lettuce in Farmer John's sphere of existence. End result? Treating the lettuce in our dimension could just be the tip of the iceberg!

## Parallel antennas multiply intensity of quantum signal.

Dad had learned while studying the effects of phase conjugate sound waves on BETAR users that conjugate waves multiplied on an exponential, rather than linear, basis. Scientists and engineers use Four Wave Phase Conjugation to turn small light sources into powerful laser beams. A recent article in *Optics Express* (on the web at:

**Kelly Research Report** is published Kelly Research Technologies, Post Office Box 128, 121 Oasis Road, Lakemont, Georgia, 30552. EDITOR-IN-CHIEF: Ed Kelly. *Kelly Research Report* is published bimonthly. Copyright in the United States. Reproduction in whole or in part is forbidden unless written permission has been granted by the publisher. Annual subscription rate is \$25.00 in North America, \$40.00 (U.S. Dollars) else where. Single copies and back issues are \$5.00 each. Correspondence and subscription requests should be sent to *Kelly Research Report* at the above address. Expiration date for a subscription is shown in brackets following the subscriber's name on the address label. Publication of this newsletter in no way constitutes a claim that psychotronic, radionic or scalar technology devices are effective in the treatment of disease or other human ailments. These devices are designed to be used for personal research and/or agricultural purposes only. We are not in the business of treating people and/or teaching to treat people to treat people. Persons with mental or physical illnesses should be referred to qualified medical practitioners licensed by federal, state or local agencies. The publisher assumes no responsibility for the accuracy, efficacy or effects of material presented here or material submitted by readers. This material represents research that is being passed on for enlightenment of others who are following, or wish to follow, similar paths.

<http://tinyurl.com/bywfg>) described how Japanese researchers at Chiba University generated an 80-fold wave conjugation. But unlike a laser, the scalar transmitter multiplies signal (information) density, not the strength (wattage) of the carrier signal. Anyone who has switched their computer from "dial-up" to "DSL" high speed Internet service can tell you the importance of signal density, in which there is a 50 fold increase in the amount of information delivered even though the tiny spark running in the telephone line never changes in strength! It occurred to my dad that simultaneously transmitting a frequency (rate) across parallel, calibrated antennas would lead to phase conjugation and an exponential increase in the depth of dimensional "penetration", simultaneously affecting the both the information and its physical manifestation on multiple levels of reality. Specific results generated upon testing of the phase conjugate antenna prototypes included decreased transmit times and increased effectiveness by factors of as little as 20 and as much as 1,000, depending on the degree of conjugation and the specific issues being addressed.

## Phase Array Antennas are easy to select and use.

The Phase Array Antenna looks like a taller and wider than usual rubbing plate. It is connected to and can be used with your Personal or Agricultural Analyzer in exactly the same way as the standard rubbing plate. In fact, while this discussion has focused entirely on the impact of this device on the transmitted signal, it is important to mention that most Researchers also report an increase in rub plate sensitivity during analysis.

While the number of different Phase Array Antennas may seem confusing, the different models merely reflect the number of parallel antennas built into each. By offering a wide range of models we can also offer a wide range of prices, ensuring that the positive benefits remain within the scope of any research budget. Users may also dowse for the correct Phase Array Antenna by focusing their intent on isolating the correct unit for the type of research they are doing. Of course, users may always ask the assistance of the instructor who completed their training.

## What if you buy one and don't like it?

As with all Kelly Research Technology's products, there is a full money back guarantee. Ship it back to us within 30 days and we will refund your money. We expect the opposite: by the end of 30 days you'll wish you had a Phase Array antenna for every Kelly Agricultural and Kelly Personal Analyzer that you own.

## Free Upgrade!

We are so certain of the value of the Phase Array Antenna that we are offering buyers participating in the Grand Opening sale a free upgrade in antennas; you order a 40 Phase Array Antenna, we'll ship you a 48 Phase Array Antenna at no additional charge. Order an 64 Phase Array Antenna and we'll ship you an antenna with 72 phase conjugation. And you still get to take the 10% sale discount!

## Help launch Kelly Research Technologies by participating in our Grand Opening Sale! Sale ends March 30, 2006, so act today!

## Smiles: Cheaper by the Dozen

*A smile is a curve that sets everything straight. - Phyllis Diller*

To follow are twelve tricks for putting a smile on the face of someone important in your life. Beware of the boomerang effect, in which you might find that smile right back on your *own* face!

1. Peel them an orange or a grape.
2. Tell them how genuinely glad you are to see them.
3. Remind them of a happy experience you once shared.
4. Offer them the last piece of bacon at breakfast.
5. Cite three things about them that delight you.
6. Share the corniest joke you know.
7. Complete a chore they usually handle.
8. Thank them for something they've done for you.
9. Shake hands, hold hands or give them a hug.
10. Sing them a song, and invite them to sing along.
11. Pick for them the prettiest flower you can find.
12. Tell them how much you love them!

## 2006 Calendar of Indications

The pioneers, mountain folks and frontier men and women of our past did not have state agency soil tests, agronomy experts or scalar analyzers to help them put the food on the table that they would need to survive to the next harvest. One "tried and true" tool that they *did* have was the "signs" or "indications" that helped predict the ideal times for crop planting, harvest of livestock and even the digging of post holes. I've seen the latter in action with my very own eyes while working on a fence project that stretched over a couple of weeks. The first holes dug had all kinds of dirt left over after the posts had been placed in the holes and tamped down, much as you would expect given the volume displaced by the posts. The holes dug at the end of the project, on the other hand, came up short when trying to fill around the new posts, requiring extra dirt be dug up and brought over from a few feet away! Many believe the "signs" also indicate the ideal days of the month in which to conduct treatments on the various areas of the body on their livestock or pets.

MONTH	Head	Neck	Arms	Breast	Heart	Kidneys
<b>January</b>	6-7	8-10	11-12	13-15	16-17	20-22

While no one should consider postponing a serious medical treatment or surgery or otherwise ignoring the advice of a qualified veterinary medical practitioner, you may find these "indicators" useful in your own research.

# Earth's Magnetic Field is Fading

Scientists agree that the Earth's magnetic field has been fluctuating and weakening since German mathematician Carl Friedrich Gauss first started recording its intensity back in 1845 (1). Since then the field's intensity has decreased by 10%.

"At that rate of decline, the field could vanish altogether in 1,500 to 2,000 years", said Jeremy Bloxham of Harvard University at a meeting of the American Geophysical Union (2).

If this were to happen, the field would collapse altogether and then reverse, causing standard compasses to point south instead of north.

The fact that the Earth's field has reversed numerous times in the past is well documented within the geologic record. This is because iron oxides and other magnetic minerals align themselves with the planetary magnetic field as the rocks cool and solidify from a magmatic (liquid) state. Like tiny compass needles, those minerals literally point forever toward the magnetic poles that existed at the time of rock formation. This phenomena also allows Earth Scientists to accurately date historical reversals of the magnetic field; analysis of the decay of naturally-occurring radioactive trace minerals establish not only the ages of the rocks themselves, but also the ages of the reversals (3).

Still, physicists are unsure whether the current reduction in field intensity reflects the prelude to the vanishing and then reversal of the global field or just a temporary lull or "exclusion" from the norm. The interval between reversals of the Earth's magnetic field can be as short as 5,000 years or as long as 50 million years. There does not seem to be any logic or rule governing the planet's behavior.

Evidence also indicates that even during the period in which the planet was effectively without magnetic poles, the field strength would most likely remain above zero, though significantly weakened and chaotic. This "disorderly-flip" theory is supported by evidence from geology that in past reversals the decline was not total. Lava flows that solidified at Steen's Mountain during a lengthy reversal process show that the magnetic poles wandered across the equator three times. Though strength of the field was reduced to about 20% of maximum, there is no record that it fell to zero during that transitional period (4).

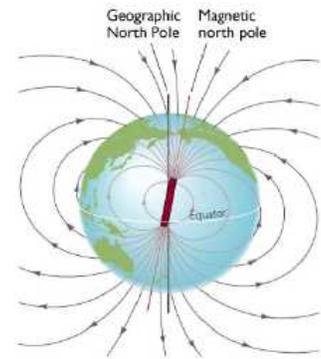

Whether large or small, such a lull could still generate significant effects, especially in regions where the weakening is most pronounced.

- Over the southern Atlantic Ocean, a continued weakening of the magnetic field has diminished shielding from the natural radiation that bombards our planet from space. Some satellites have fallen prey to the increased radiation levels, including a Danish satellite designed, ironically, to measure the Earth's magnetic field (5).
- Charles Jackman of NASA's Goddard Space Flight Center reports that significant but temporary losses of atmospheric ozone can be generated as the large influx of radiation in the form of protons streaming from the sun affects atmospheric chemistry of the atmosphere (6).
- Man-made and organic systems that depend on the magnetic field for navigation and other uses would be radically compromised whether the field disappears or enters a disorderly state. Magnetic lines of force near Earth's surface become twisted and tangled, and magnetic poles pop up in unaccustomed places. A south magnetic pole might emerge over Africa, for instance, or a North Pole over Tahiti (7).

Protons and electrons, the building blocks of physical matter, are themselves tiny permanent magnets that are affected by the health of the global field in ways as of yet completely understood by traditional scientists (8). Whether we are on our way to a complete reversal of the planetary magnetic field or just a significant deviation from the norm, its clear that magnetic deviation can have a significant impact on those conducting research in and working with subtle energies.

# Essential Oils: Pharmacy of the Ancients

For most of mankind's history people understood the healing and harmful properties of the flowers, seeds, leaves, trees, bark and other plants materials in

the areas in which they lived. These organic materials were ground into pastes that could be made into poultices and plasters, or dried for use in teas and other elixirs. In many cases the "researchers" of the day realized that plant components could be combined to magnify the results generated from any one of the plants, or to achieve wholly different reactions entirely! In this way plants and trees were used to treat all manner of ailments, illnesses and conditions.

Eventually it was realized that in most cases a plant's "active ingredients" could be distilled into oils that contained both its healing essence and aroma. This allowed easier combination, application and, most importantly, transportation to other regions where their scarcity made them extremely valuable. For this reason Egypt was regarded as the Paris of the ancient world, known throughout the world as a source of top quality essential oils for health care and perfumes. While everyone remembers that when the three magi went east from the kingdom of Persia to meet and worship the baby Jesus they brought three gifts: gold, Frankincense and Myrrh. The value of gold is

certainly well known to this day, but not many stop to consider why the baby king would want Frankincense and Myrrh. Of course they were essential oils; Frankincense was thought to stimulate the immune system and be good for skin, and Myrrh was known to be useful for wound care, oral (teeth and gum) problems and respiratory problems.

Today the world's giant pharmaceutical companies are quietly searching the remote corners of the planet for new plants and "primitive" remedies that can be reprocessed and reconstituted into expensive drugs that can only be prescribed after an expensive visit to a doctor's office. But luckily **the wisdom of the ancients was too widely disseminated to be kept out of the reach of the people.** In the modern age there are many reputable firms offering a wide variety of high quality essential oils and extracts for use by those exploring alternative methods of healing, health and happiness, including such highly regarded companies as *Young Living Essential Oils*.

Kelly Research Technologies is pleased to offer the essential oils by two leading firms, *Nature's Alchemy* and *Heritage Store*. These companies have consistently provided us with oils that check out well by our customers, with many reporting positive impacts to general vitality, or through their use in aromatherapy. To follow is a list of the essential oils offered by Kelly Research Technologies.

## Book Feature: *Aromatherapy A-Z*

**Unsure of which essential oils to use, or how to use them?** We are here to help! Those interested in learning all about the world of essential oils should consider purchase of *Aromatherapy A-Z* by Connie and Alan Higley and Pat Leatham. The authors have compiled a vast amount of information on essential oils in a fresh and easy step-by-step reference guide. Ordinarily priced at \$17.95 per copy plus shipping and handling, with our grand opening sale this book will only cost you \$16.16, and we'll throw in the cost of postage!

## Kelly Research Technologies' Essential Oils Collection

Essential Oil	Provider	Quantity per Vial	Price
Anise	Nature's Alchemy	½ ounce	\$5.25
Basil	Nature's Alchemy	½ ounce	9.95
Bergamot	Nature's Alchemy	½ ounce	12.85
Black Pepper	Nature's Alchemy	½ ounce	12.25
Camphor	Nature's Alchemy	½ ounce	4.00
Cedarwood	Nature's Alchemy	½ ounce	3.40
Cedarwood	Heritage Store	1 ounce	6.45
Chamomile, Roman	Nature's Alchemy	½ ounce	30.75
Chamomile, Wild	Nature's Alchemy	½ ounce	25.95
Cinnamon Bark (cassia)	Nature's Alchemy	½ ounce	7.08
Cinnamon Leaf	Nature's Alchemy	½ ounce	4.98
Cinnamon	Heritage Store	1 ounce	11.00
Citronella	Nature's Alchemy	½ ounce	3.66
Clary Sage	Nature's Alchemy	½ ounce	12.95
Clove Bud	Nature's Alchemy	½ ounce	6.32
Cypress	Nature's Alchemy	½ ounce	8.98
Eucalyptus	Nature's Alchemy	½ ounce	4.15
Eucalyptus	Heritage Store	1 ounce	4.95
Fennel, Sweet	Nature's Alchemy	½ ounce	6.25
Fir Needle	Nature's Alchemy	½ ounce	5.92
Frankincense	Nature's Alchemy	½ ounce	22.65
Geranium	Nature's Alchemy	½ ounce	11.62
Ginger	Nature's Alchemy	½ ounce	11.08
Grapefruit	Nature's Alchemy	½ ounce	8.40
Grapefruit	Heritage Store	1 ounce	9.45
Jojaba	Heritage Store	1 ounce	4.95
Juniper Berry	Nature's Alchemy	½ ounce	12.95
Lavender	Nature's Alchemy	½ ounce	9.00
Lavender	Heritage Store	1 ounce	9.95
Lavender, Bulgarian	Nature's Alchemy	½ ounce	11.25
Lemon	Nature's Alchemy	½ ounce	3.98
Lemongrass	Nature's Alchemy	½ ounce	4.82
Lime	Nature's Alchemy	½ ounce	4.98
Mandarin	Nature's Alchemy	½ ounce	6.42
Marjoram, Sweet	Nature's Alchemy	½ ounce	12.08
Myrrh	Nature's Alchemy	½ ounce	21.32
Nutmeg	Nature's Alchemy	½ ounce	6.92
Orange	Nature's Alchemy	½ ounce	3.15
Orange, Sweet	Heritage Store	1 ounce	7.45
Oregano	Nature's Alchemy	½ ounce	16.58
Oregano	Heritage Store	1 ounce	12.95
Palmarosa	Nature's Alchemy	½ ounce	7.58
Patchouli	Nature's Alchemy	½ ounce	9.92
Pennyroyal	Nature's Alchemy	½ ounce	10.00
Peppermint	Nature's Alchemy	½ ounce	5.98
Peppermint	Heritage Store	1 ounce	7.45
Rosemary	Nature's Alchemy	½ ounce	5.85
Rosemary	Heritage Store	1 ounce	7.95
Rosewood	Nature's Alchemy	½ ounce	6.95
Sage	Nature's Alchemy	½ ounce	7.95
Sandalwood	Nature's Alchemy	½ ounce	53.95
Spearmint	Nature's Alchemy	½ ounce	5.16
Tangerine	Nature's Alchemy	½ ounce	4.16
Tea Tree	Nature's Alchemy	½ ounce	7.50
Thyme, Red	Nature's Alchemy	½ ounce	12.75
Vetivert	Nature's Alchemy	½ ounce	10.95
Wintergreen	Nature's Alchemy	½ ounce	5.16
Wintergreen	Heritage Store	1 ounce	4.20
Ylang Ylang	Nature's Alchemy	½ ounce	10.66

## Essential Oil Care Packages

Those of you with specific health issues to research may wish to consider purchasing one of our **Essential Oil Care Packages**. Drawn from the pages of *Aromatherapy A-Z*, each package includes vials of each of the essential oils required to address that specific ailment or issue, as well as a card with the step-by-step instructions for their use. The best part is, not only have we done the research for you, but we've discounted the price of the oils included in these **Essential Oil Care Packages** by 10% as compared with the cost of buying them individually. And for a limited time, order two **Essential Oil Care Packages** and we will knock \$6.16 off the price of *Aromatherapy A-Z*; own this handy reference volume for \$10.00 and we'll still throw in the cost of postage!

**Abdominal Sluggishness #1**

**\$11.25**

Contains: 1 bottle each of Nature's Alchemy Orange, Spearmint and Tangerine

**Abdominal Sluggishness #2**

**\$12.00**

Contains: 1 bottle each of Nature's Alchemy Cedarwood, Lemon, and Peppermint

**Abdominal Spasm/Cramping**

**\$46.50**

Contains: 1 bottle each of Nature's Alchemy Chamomile (Roman), Geranium, and Lavender

**Airway Relief**

**\$34.50**

Contains: 1 bottle each of Nature's Alchemy Cedarwood, Chamomile (Roman), and Eucalyptus

**Blood Pressure/Hypertension #1**

**\$23.25**

Contains: 1 bottle each of Nature's Alchemy Geranium, Lavender and Lemongrass

**Blood Pressure/Hypertension #2**

**\$28.50**

Contains: 1 bottle each of Nature's Alchemy Cypress, Marjoram and Ylang-Ylang

**Burn Care**

**\$59.00**

Contains: 1 bottle each of Nature's Alchemy Chamomile (Roman), Chamomile (Wild) and Lavender

**Fluid Assist #1**

**\$17.50**

Contains: 1 bottle each of Nature's Alchemy Cypress, Fennel, and Tangerine

**Fluid Assist #2**

**\$23.50**

Contains: 1 bottle each of Nature's Alchemy Cypress, Juniper Berry, and Tangerine

**Rash/Skin Care**

**\$60.50**

Contains: 1 bottle each of Nature's Alchemy Chamomile (Roman), Lavender, Myrrh, and Peppermint.

**General Safety Information:** Do not take any oils internally without consultation from a qualified aromatherapy practitioner. Do not apply undiluted essential oils, absolutes, CO2s or other concentrated essences onto the skin. If you are pregnant, epileptic, have liver damage, have cancer, or have any other medical problem, use oils only under the proper guidance of a qualified aromatherapy practitioner. Use extreme caution when using oils with children and give children only the gentlest oils at extremely low doses. It is safest to consult a qualified aromatherapy practitioner before using oils with children.

---

*Be an example of goodness and light. Know that your strength is from inner convictions, your own faith to be and do what is right. That is where all your strength comes from in the end.*

Marianne Keeler Kelly - May 1986
