

THE REPLICATOR

Experimental Electronic Potentizer

The Replicator is a *stand-alone* radionic imprinting and simplified broadcasting device that captures and infuses in-phase and reverse phase energetic frequency information into the substrates of choice at varying and/or stacked levels of potency. A variety of input and output options allow instant integration with samples and information from every possible modality.

Under the hood, The Replicator is a streamlined version of a **Kelly Personal Instrument** and an **Electronic Potentizer** built into a single case. The Replicator has the same flexibility as a Kelly Personal Instrument with regards to input. Energetic waveforms emanating from physical witnesses, samples and reagents are captured by the spiral coil input well, while external input ports allow introduction of a variety of electronic and signal information, including:

Plate capacitor tuners, silver Sephorah radio coil and solid state amplification visible pre-wiring. Yellow circles show approximate location of input and output wells.

- Direct input from soil/plant probes
- Scalar waveforms from another radionic instrument
- Frequencies or tones from a signal generator
- Frequencies, music and other output from a computer
- Recorded music, tones and specialized frequencies delivered by tape, compact disk or mp3 player

If it can be put in a well or transmitted through a wire The Replicator can capture its subtle energy signature, amplify it and imprint it into a substrate!

The New Anapathic Purifier

When set for "reverse phase" operation, **The Replicator** operates identically to the **Kelly Experimental Anapathic Purifier**, a specialized radionic instrument that was designed to reduce the energetic strength of contaminants found in wells, tanks, silos, barns and places where animals live.

Simply place a witness for the well, tank, barn, field or organic system in The Replicator's input well and a sample or witness for whatever is to be removed in the output well. The instrument's second solid state amplifier phase reverses the signal captured and broadcasts a mirror image of the scalar waveform back to the witness – a cancellation wave that will reduce the energetic strength of the targeted material. The impact of these broadcasts will be intensified when The Replicator is used with either the **included helical coil reaction plate/antenna** or an optional phase array reaction/plate antenna.

With careful attention to broadcast times, the unit may also be used to carry out broad-based energetic purification. Samples of feed, seed, and water can be placed in the output well for broadcast of a comprehensive signal reduction waveform. While the energetic strength of positive and negative properties will be simultaneously reduced, relatively smaller levels of contaminants will typically be pushed below the energetic kindling point well before degrading the properties of the primary substance.

If it can be put in a well or transmitted through a wire, The Replicator can capture its subtle energy signature, amplify it, reverse it and broadcast it back to the witness during "Reverse Phase" operation.

Simplified Radionic Broadcasting

When set for "in phase" operation, **The Replicator** operates identically to a **Kelly Personal Instrument** that has been set to the "0.00-100.00" position. The device is thus ideal for broadcast of the energetic signatures of reagents, supplements and signal information back to the soil, plants or other organic systems represented by the witness in the input well. Examples of reagents or other information that could be broadcast in this way include:

- Soil supplements, additives, and nutrients
- Herbal compounds & essential oils
- Homeopathic potencies/remedies
- Colors, light, gems and minerals
- Any signal information, including frequencies, tones and music

If it can be put in a well or transmitted through a wire, The Replicator can capture its subtle energy signature, amplify it and broadcast it back to the witness during "In Phase" operation.

The Replicator: Potentizer/Purifier/Broadcaster..... \$950

The Replicator: (with dual Pyrex wells).....\$1,050

*Use this device with your **Personal Instrument**, **Seeker** or **Beacon**!*
