

In This Issue:

- 1: View from the Dome
- 2: Community Contributions
- 3: KRT Great Radionics Expo – Speaker List
- 4: KRT Great Radionics Expo – Program List
- 7: KRT Great Radionics Expo – Registration
- 8: Radionics and the Vibratory Nature of Matter

Special Supplement: The Hieronymus Patent
Special Supplement: Raymon Grace Seminar

View from the Dome

This has been an amazing time at Kelly Research Technologies! Following the free online publishing of *Radionics Book 3: Radionic Rates – Alpha** we have seen a tremendous increase in interest and enthusiasm for Kelly radionic instruments that has stretched far beyond even the remarkable growth we had already experienced over the course of the last few years.

Folks around the world have responded by giving Kelly instruments a try for the first time. In the past we might have shipped an order overseas once every month or two, but now we find ourselves shipping a package to shores as distant as Japan, Australia, or the countries of Western Europe almost every week. And while we are extremely grateful for the opportunity to touch more lives than ever before, we have also suffered some growing pains as a result, with lead times much longer and slower than we have ever experienced – including this newsletter!

For these reasons I am very happy to report that for the first time in many years **we have hired a new full-time employee** to help us meet these new challenges. Erin Robles has had decades of experience working with Kelly Research Technologies and radionic instrumentation, as she is my sister and the daughter of KRT founder Peter J. Kelly. Erin has already made a huge impact in helping us to catch up with our backlog of orders and you can look forward to seeing her ideas expressed in future issues of this newsletter.

You can also meet Erin and me at KRT's Great Radionics Expo, an event that has been organized for the fall of 2013. Inside this issue you will find descriptions of the **nearly TWO DOZEN scheduled programs, with speakers from around the country** coming together to share what they have learned over the course of years and years of conducting radionic and other energetic research at their homes, farms, companies, and other organizations.

Please do not put this off thinking you can come another year! Ordinarily we prefer to focus on supporting the U.S. Psychotronics Association's annual conference. However, because that meeting was suspended for 2013 while the group reorganizes, **the KRT Great Radionics Expo will be a one-of-a-kind, one-time event focused exclusively on radionics.** In 2014 we will return to presenting our regular KRT training workshops and working with the USPA.

If you are ready to take your radionic research to the next level and take charge of your energetic destiny then you should register today, pack your bags, and come meet us in beautiful South Dakota at the KRT Great Radionics Expo!
