View from the Dome

Happy New Year Everyone!

We stand together at the birth of a new calendar year, a new solar cycle, and a new epoch of opportunity for each of us to abandon obsolete patterns of information, communication, and stagnation. This has been clearly evidenced by the success we have witnessed with friends and collaborators around the world, where new tools and resources have brought about new dimensions of knowledge and success.

At KRT, we have seen the interest in radionics continue to grow as shown by requests for information, distribution of instruments, enrollment in training programs, and the enthusiasm of the participants in the 2013 KRT Great Radionics Expo. We regularly have our minds blown by folks who are applying radionics in ways that defy expectations and expand the limits of possibility. ***You, too, can use your radionic instrument every day:***

- **Test the energetic impact of known poisons** like GMO foods, artificial sweeteners, artificial flavors, and artificial coloring on General Vitality before eating the next meal.
- **Test the energetic impact of the things you wear every day** (jewelry, watches, glasses, phones, etc) on General Vitality. Clean up, detoxify, and take action as necessary!
- Check your home, office, barn, and vehicle for **energetic pests and parasites**. Eliminate and eradicate as necessary!
- Cold scan a rate to **Remove All Obstacles** from your life.
- If you have time for nothing else, every day **cold scan for that rate that is most needed at that time and in that place**. Be sure to ask permission *and* check for appropriateness by asking, "Is this a good broadcast to make, thine will be done, no harm to anyone?"

I urge each of you to take part in this revolution of ideas by rolling up your sleeves and doing the work that already calls to you. Are you making the world a better place for yourself, your family, and your community? What gifts do you – a beautiful individual forged in love and light – have to offer? You know the answer to that better than anyone! Now **take action and be amazed by the results!**

With kindest wishes for a happy, healthy, and prosperous 2014 from all of us at Kelly Research Technologies,
